

RF OVERFLOW INFINITY POOLS CONTROL

Overflow infinity pools require that there is always an optimum level of water to have an efficient filtration of the system and a good overflow effect. Solution for the control of the filtration pumps of this type of swimming pool: **the electronic panels for RF remote control overflowing swimming pools**. Equipped with our electronic devices specially designed for this type of installation. With this equipment, the overflow pool filtration pump and the water level of the compensation tank can be controlled. It includes an electronic system for protection against errors in the installation of the pool.

R78D3

Electric control panel for **overflow infinity pool** to connect an existing electric pool panel. It includes **R78D3R** receiver control, output 24VAC, **R78D3E** emitter control, 4 electrodes and emitter battery. **Protection** against installation errors of the electrodes.

SD3D

Electric control panel for **overflow infinity pool**. It includes **SD3D** receiver module, **SD3DE** emitter module with 4 electrodes and emitter battery. **Protection** against installation errors of the electrodes.
